Education

Brock University, St. Catharine's, ON *Sep 2024 – April 2028*
Bachelor of Science (Honours) - Computer Science
Relevant Coursework: Data Structures, Cloud Computing, Machine Learning, AI, Computer Vision, Big Data

Skills

Languages & Frameworks Python, Java, C/C++, JavaScript, React.js, Next.js, Three.js, Scikit-learn, MIPS Assembly, AR/VR Kits (ARKit/ARCore)
Cloud Platforms: AWS, Microsoft Azure, Google Cloud Platform, Firebase
DevOps & Tools: Docker, Kubernetes, Jenkins, Git, CI/CD, IntelliJ, VS Code, JIRA, Postman, Grafana
Databases: MySQL, Elasticsearch, SQLite

Professional Experience

Pioneer Engineering Solutions, Junior Network Administrator IT Assistant *Feb 2022 – July 2024*

- Engineered scalable backend services in Planner, a Java SpringBoot and REST API-based framework, to batch millions of express and scheduled orders into optimized last-mile delivery trips across 500+ locations.
- Optimized carrier, van, and driver assignment algorithms, reducing average route time by 18% and improving delivery success rates in high-volume, time-sensitive environments

FRCRCE Engineering college, IT Support Specialist / Lab Assistant *August 2020 – April 2022*

- Designed Node.js microservices for a smart-gateway IoT device and implemented MQTT-based pub-sub architecture to enable real-time monitoring and scheduling of events via a cloud-based UI.
- Managed enterprise software deployment and license compliance for high-compute suites
- Diagnosed and optimized inefficient SQL database queries, reducing system response times by 30 percent and enhancing application performance.

Academic Projects

NeuroBank Guardian *Jan 2026*

- Developed a next-generation, AI-powered banking assistant that transforms traditional financial interfaces into an intelligent, voice-activated experience using Local LLMs and Vector-Based RAG, allowing users to manage finances through natural conversation while maintaining 100% data privacy.
- Integrated WebSockets for live balance updates and integrated Azure Speech to build bilingual voice controls, including biometric security.
- Achieved 82% accuracy on a custom dataset of 1,000 real-world scenarios.

NutriBudget *Noc 2025*

- Built an award-winning Price-aware nutrition planner using GroceryDB (nutrition + prices) with ML clustering, optimization, a Flask API, and a Next.js dashboard.
- Enabled a multi-model machine learning ensemble—combining Random Forest for quality classification and Linear Regression for price fairness, to calculate a weighted product score.

Certifications

Oracle Cloud Infrastructure Foundations Associate *December 2025*

Honors & Leadership

- Alumni Mentor, FIRST Robotics Program: Provided technical consultation to regional robotics teams, guiding students through mechanical design and Java-based control systems to bridge the gap between high school engineering and university-level Computer Science.
- Lead Developer, Hackathon Innovation Series: Directed cross-functional teams to engineer data-driven prototypes for social impact, managing the end-to-end development of applications like NutriBudget by integrating ML models and real-time data processing to solve accessibility challenges.
- Student Ambassador, Brock International: Represented the university's Computer Science department to prospective global applicants, providing technical workshops and academic guidance to help incoming international students navigate their transition into the Canadian tech ecosystem.
